

Sustainability

Henrietta Tsosie, Illinois Institute of Technology (IIT) mechanical engineering student, wants to make a difference in how we consume energy. Henrietta's current interests are alternative energy and hybrid vehicles. On its landmark Chicago campus, IIT prepares students of all backgrounds to be tomorrow's leaders in technology. Through unique interprofessional team projects and faculty-supported research, students gain hands-on experience.

All students attending a community college will be automatically reviewed for either an IIT Transfer Student Scholarship or an IIT International Student Scholarship. Both scholarships are up to \$12,000 annually. In addition, Phi Theta Kappa students will be awarded an additional scholarship in the amount of \$5,000. All scholarships are renewable.

Contact Gerald P. Doyle, Associate Vice President of Undergraduate Enrollment and Financial Aid to learn more about these programs or to discuss articulation agreements or other collaborative initiatives, at 312-567-5203, or doyle@iit.edu.
