

# General Physics Laboratory Policies

August 21, 2009

## Safety

1. in order to participate in the lab, you will have to sign the safety form. Your TA will provide this for you along with any safety training required for the lab.
2. Safety training for General Physics Labs consists of the following:
  - (a) No open toed shoes allowed in the lab
  - (b) No shorts or skirts allowed in the lab
  - (c) Safety glasses must be worn during certain experiments as identified by Bill Luebke
  - (d) No food or drink permitted in the lab

## Grading

1. Each student needs to copy the data for themselves and have it signed by the TA before leaving the lab. This data sheet must be attached to the report.
2. Each student will write his/her own report.
3. Department policy is that in order to pass the course, students must complete all labs and turn in reports for **each one**. You may make up **one** missed lab during the Makeup Week at the end of the term. Make sure to schedule this with your TA so he/she can be there and have the equipment ready for you.
4. Lab reports must be turned in the week after the laboratory session. Reports turned in up to 1 week late will have a maximum grade of 50% of the total. Reports turned in more than 1 week late will receive a score of 10% with no exceptions.
